

Food Service District Questionnaire Content

This is a list of the major topics covered in the district-level food service questionnaire. For more detailed information on the content of the study questionnaires, please visit the project web page at www.rti.org/shpps.

- techniques used to plan menus for school meals
- nutrition information used when ordering foods for schools
- practices used when preparing food for schools
- the availability of school breakfast and lunch
- the variety of entrees and a la carte foods
- the availability of brand-name fast foods in school cafeterias
- district assistance given to schools to identify ways that food service staff might help teach students about nutrition and healthy eating
- staff development provided to district or school food service staff
- promotion of community awareness of school food service by district staff
- credentials that district and school food service coordinators are required to have
